CITY DATA 3.0

P.hD Candidate Fernando Benitez, Dr. Joaquin Huerta, GeoC: Enabling Open Cities.
Universitat Jaume I - Spain
@mfbenitez - @geoC_UJ

MAIN CONCEPTS

Reuse level
Discoverability level } Available **Open Data** in cities.

PROBLEM STATEMENT

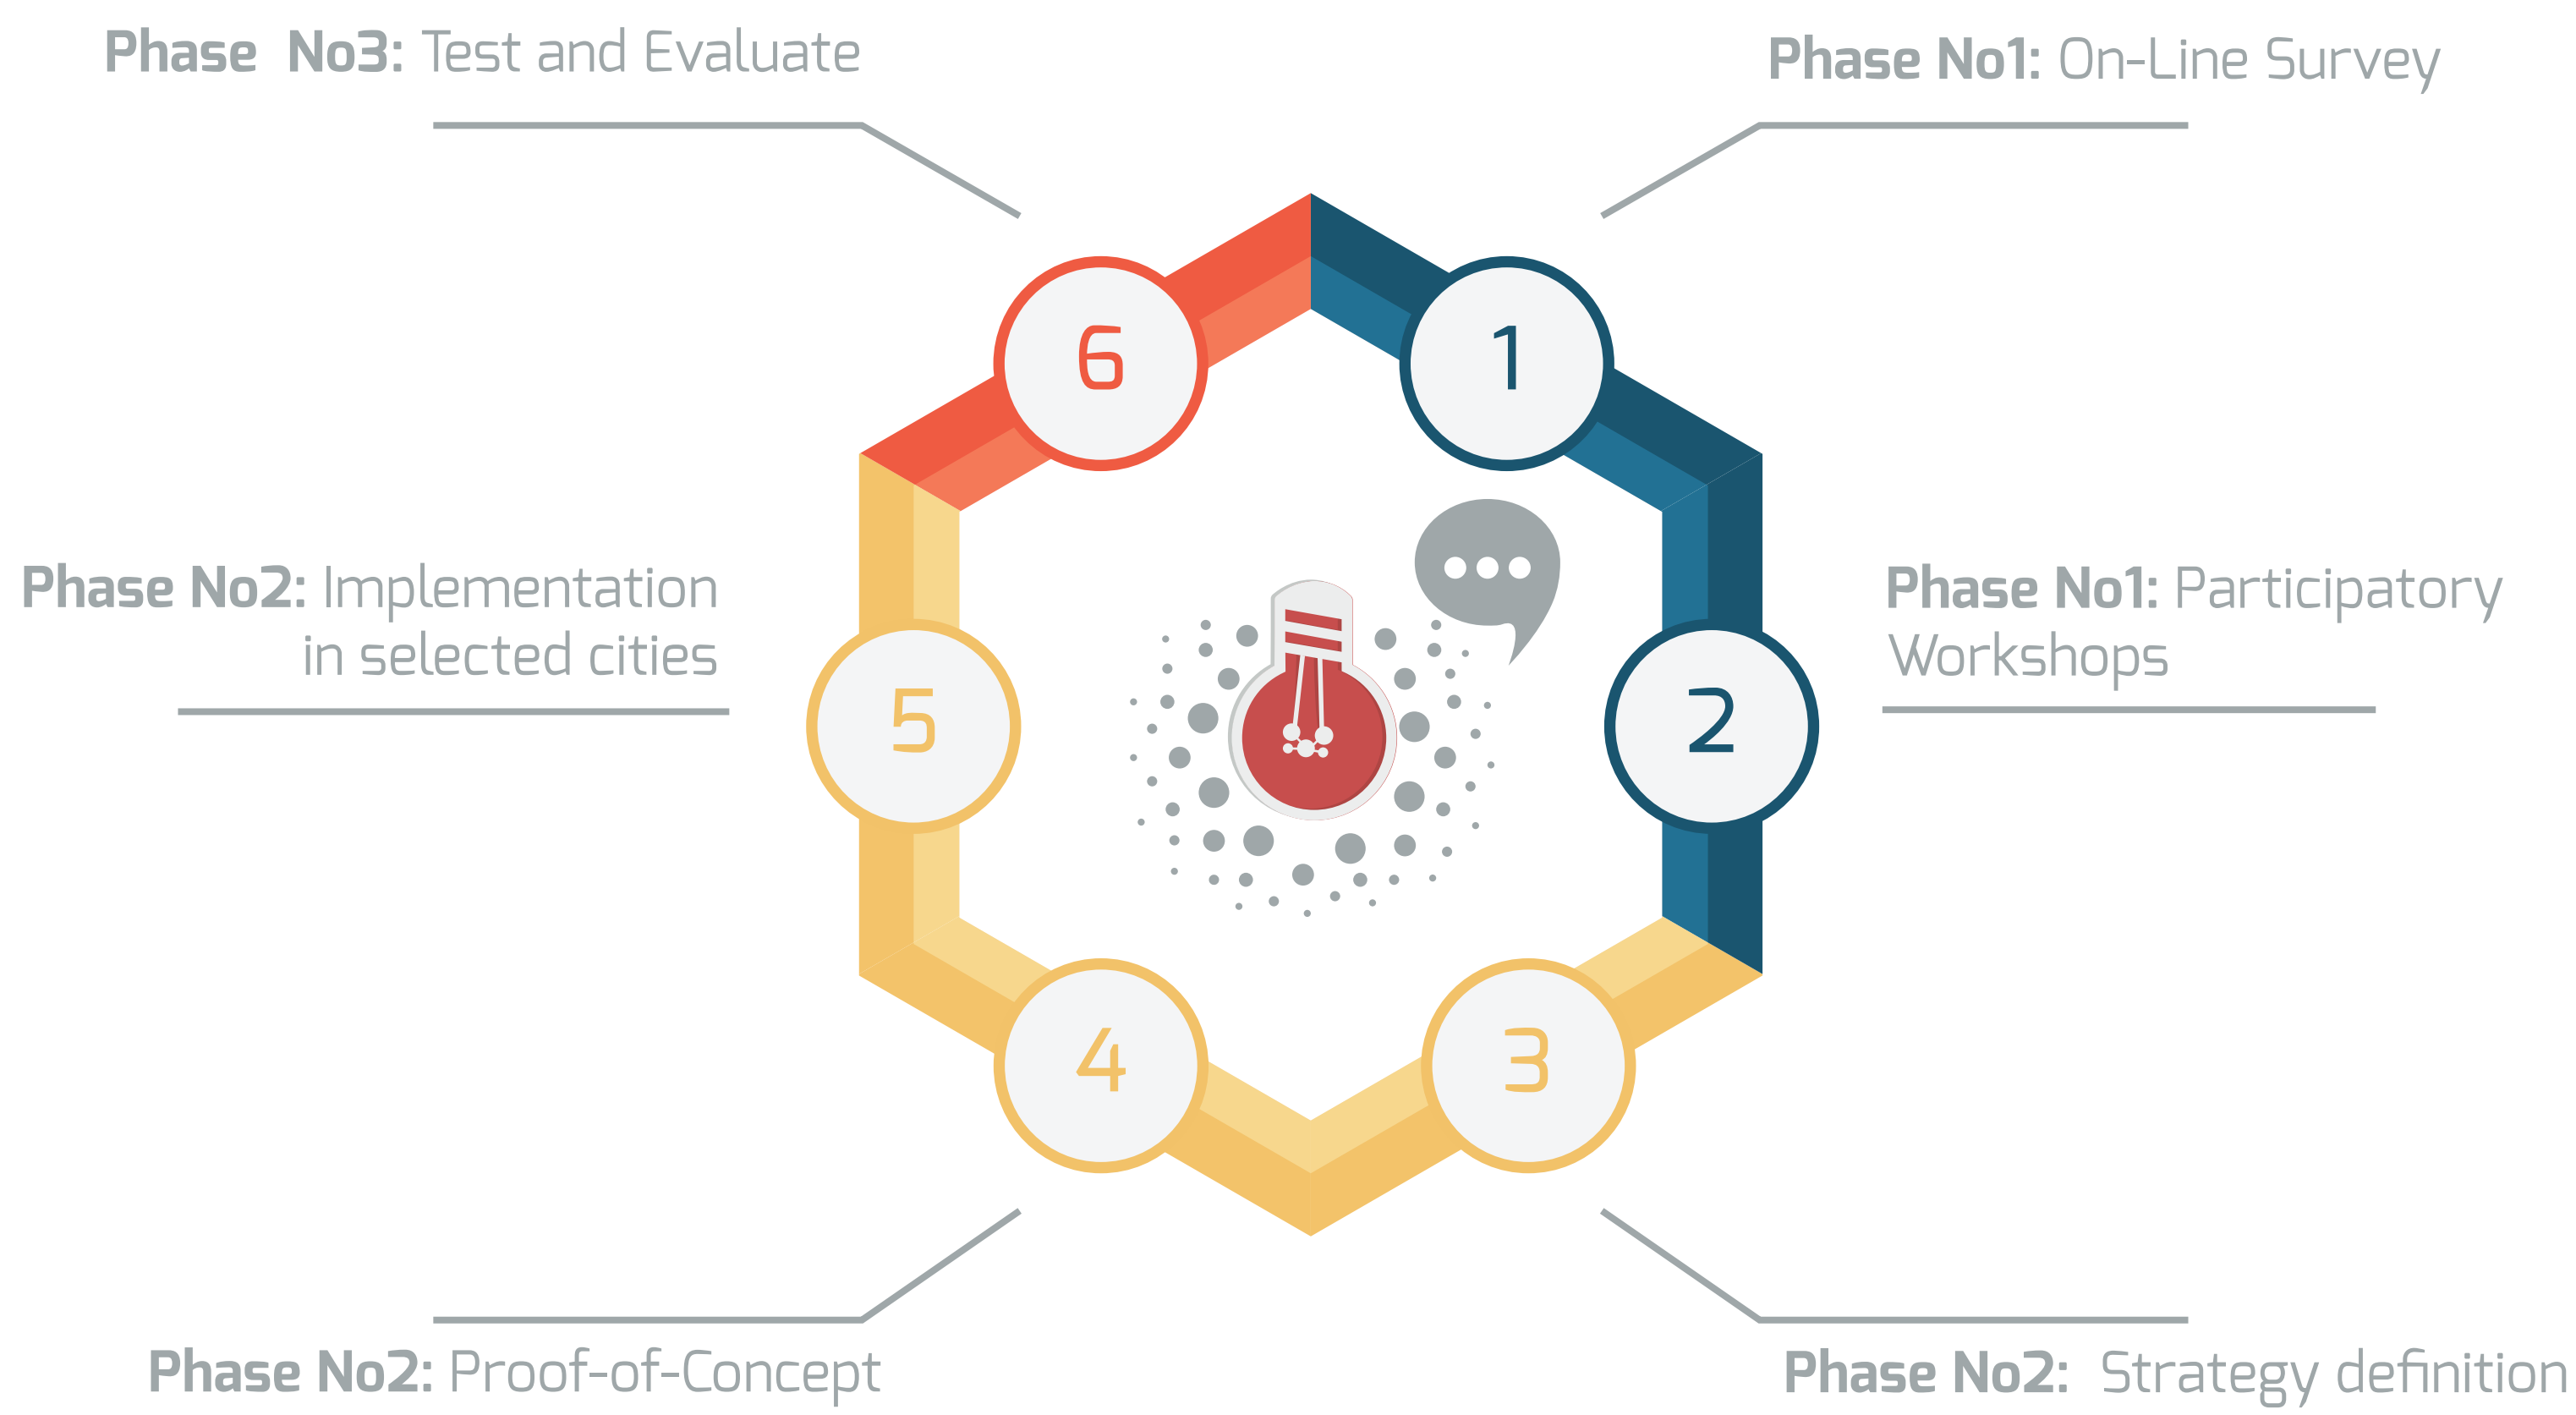

What is the usefulness level of available published geographic information in cities' open data portals?

Are cities effectively using these available services to promote transparency, collaboration, and entrepreneurship?

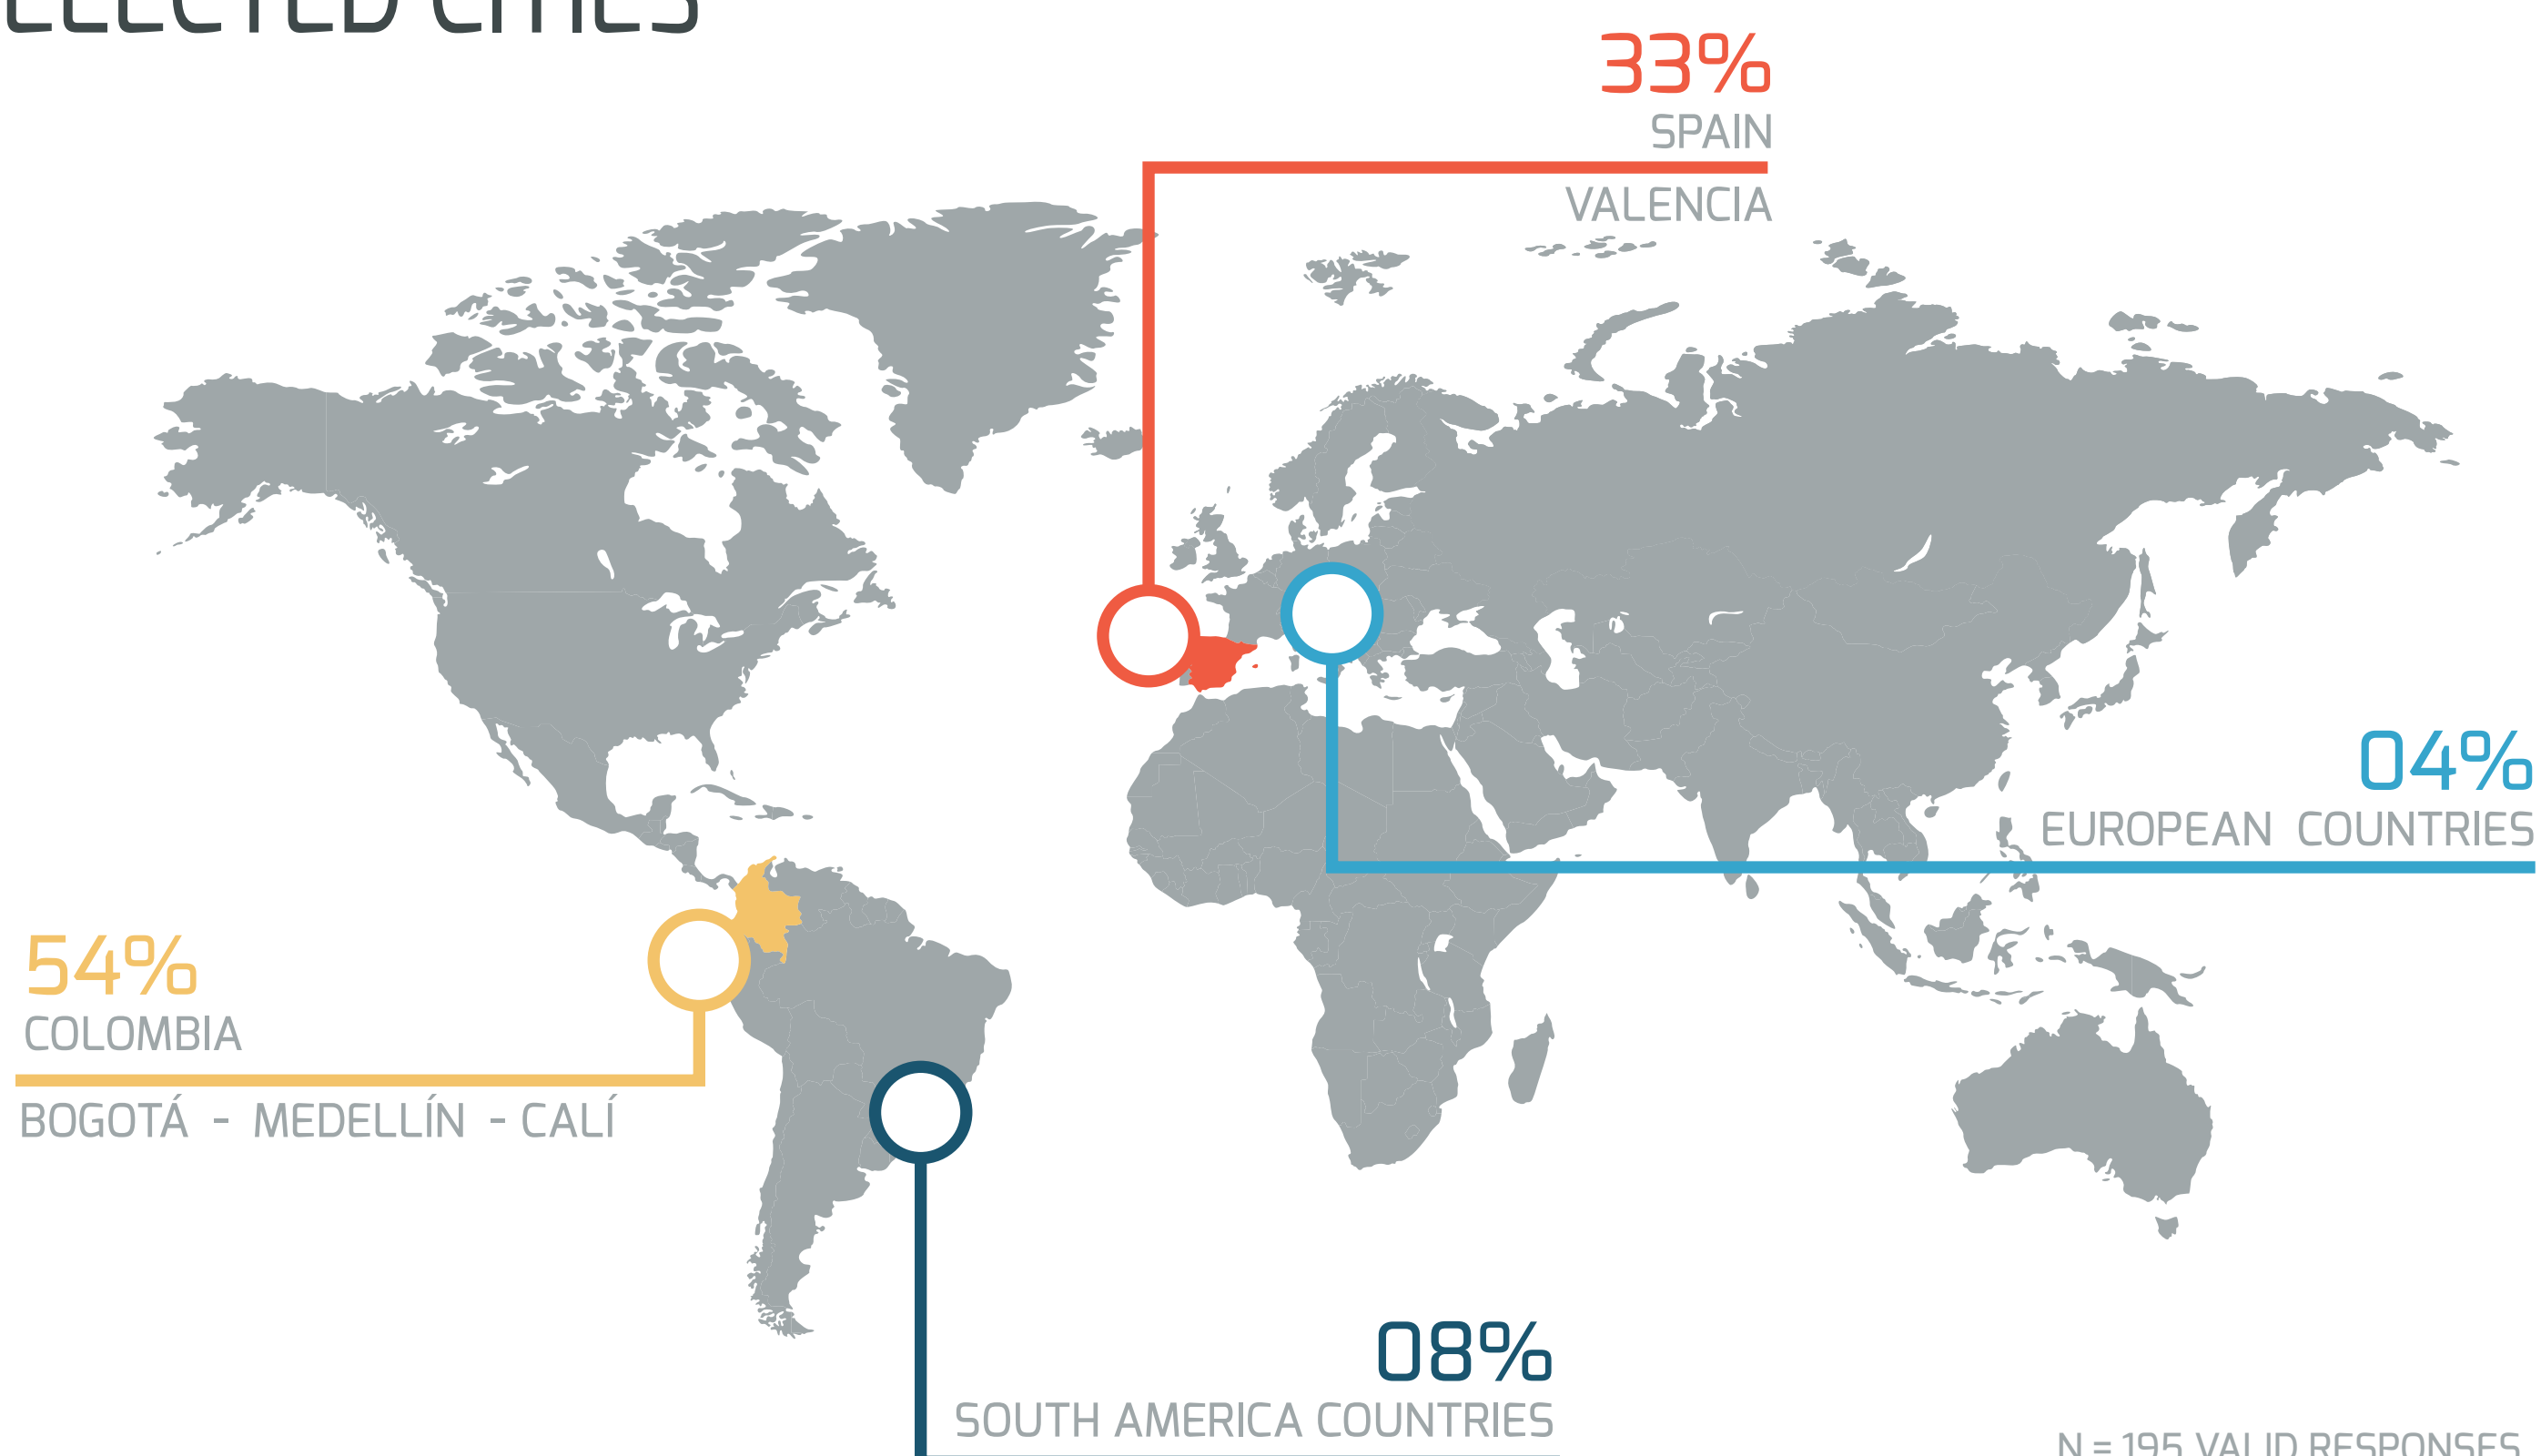

CHALLENGES

- 1 It is possible to determine the usability barriers that prevent the published geographic data in the cities to be used by data consumers.
- 2 Create a generic strategy to improve the re-use and discovery level of geographic information available in cities
- 3 Study a relationship between these identified barriers and the re-use level of available geographical data on cities.

METHOD

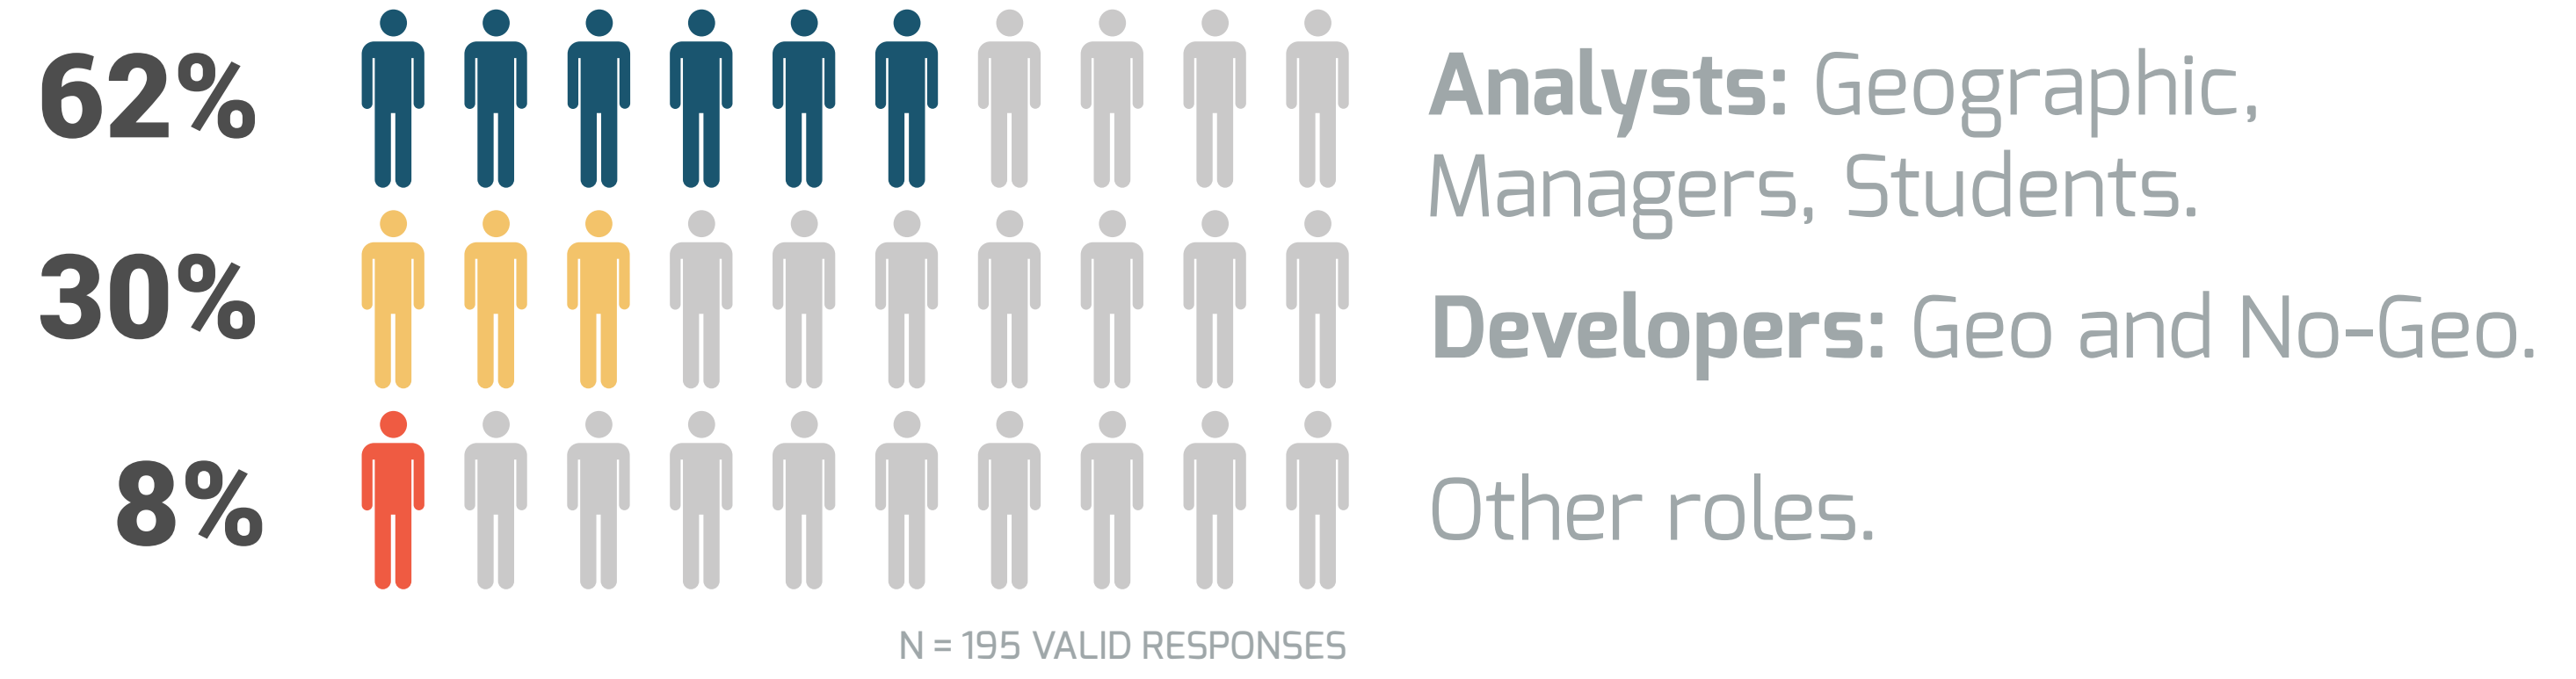

SELECTED CITIES

A generic initiative to promote and assess the reuse of geographic information in cities - Early steps

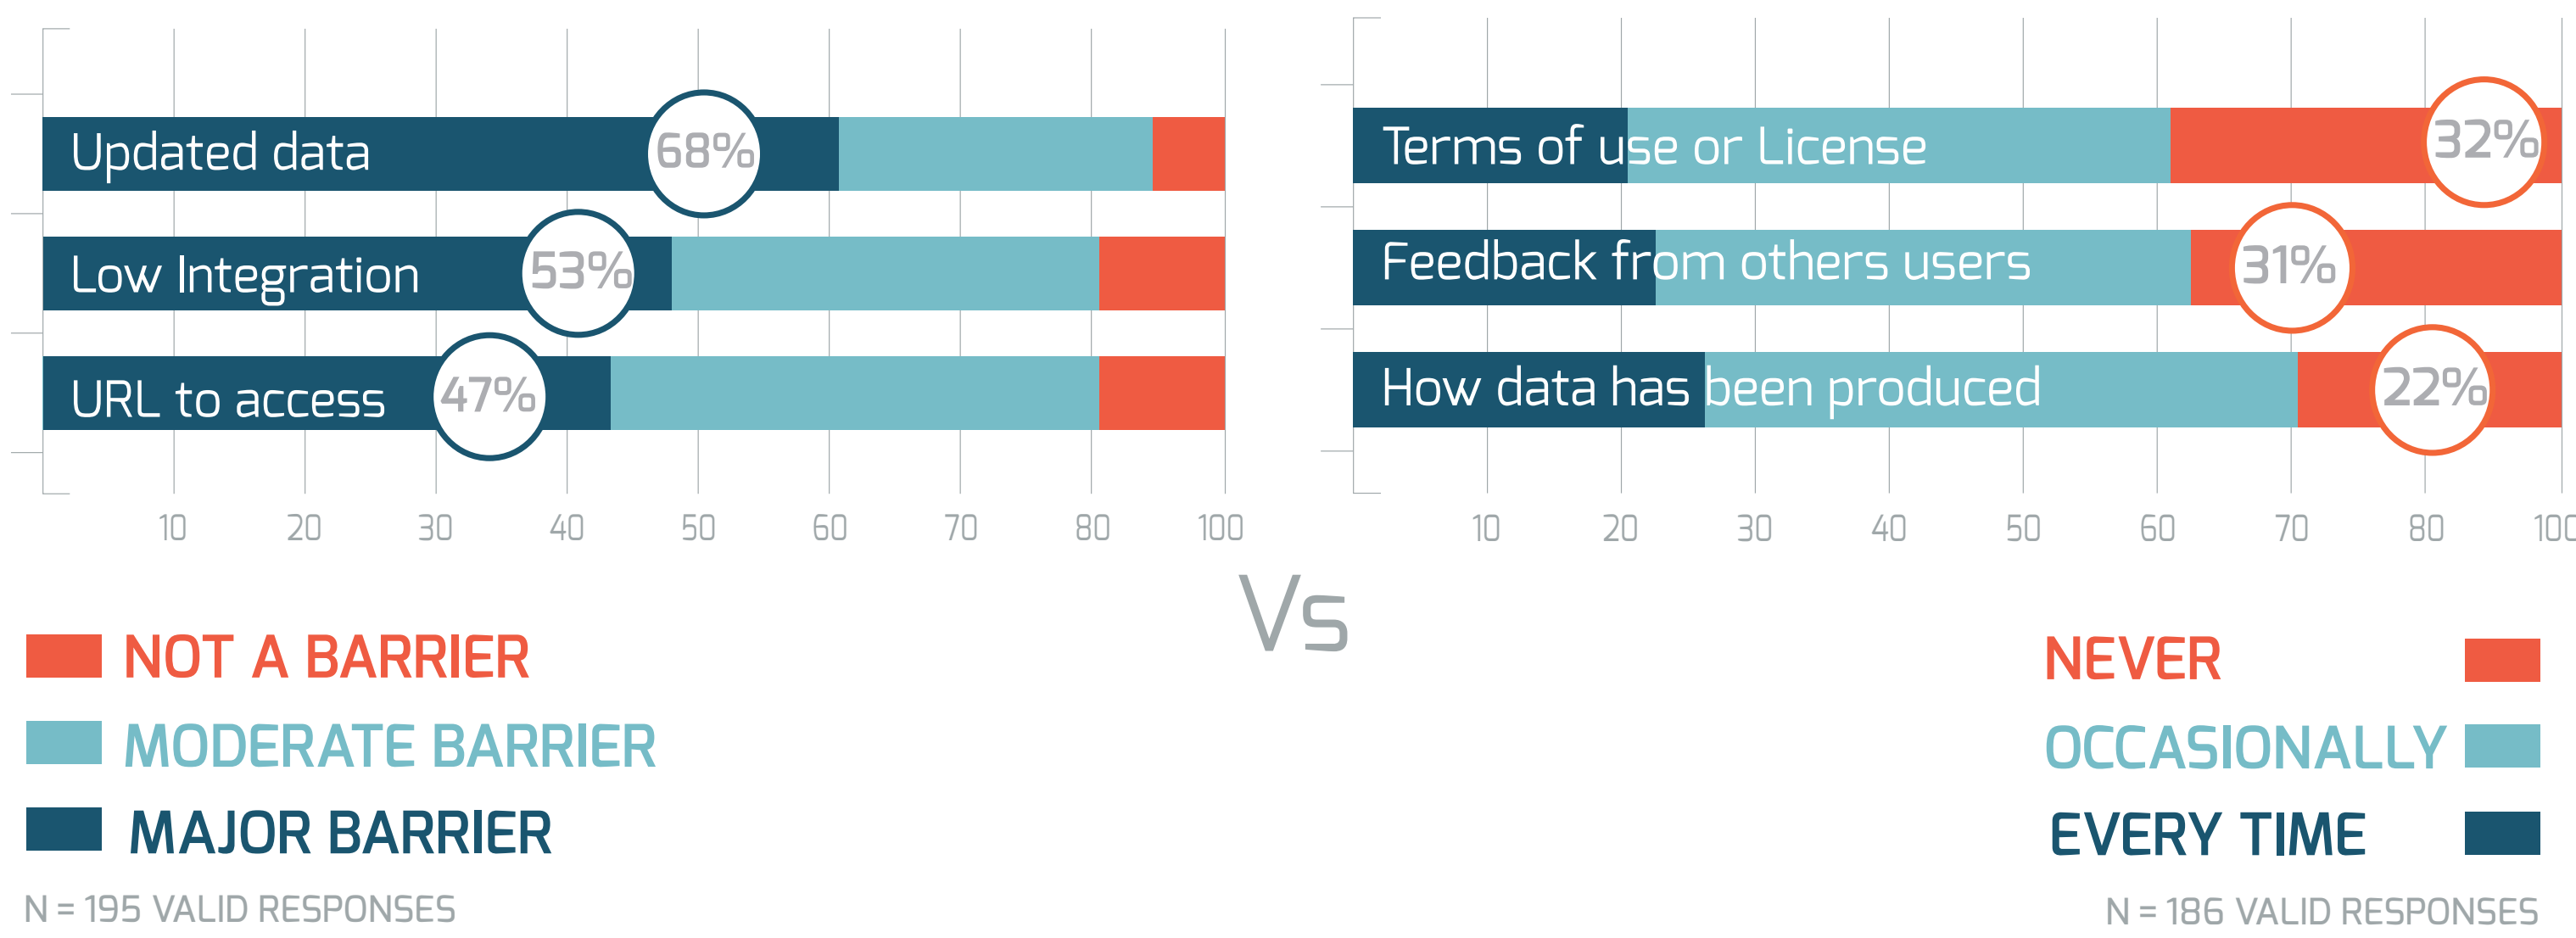

DATA CONSUMERS - REUSERS.

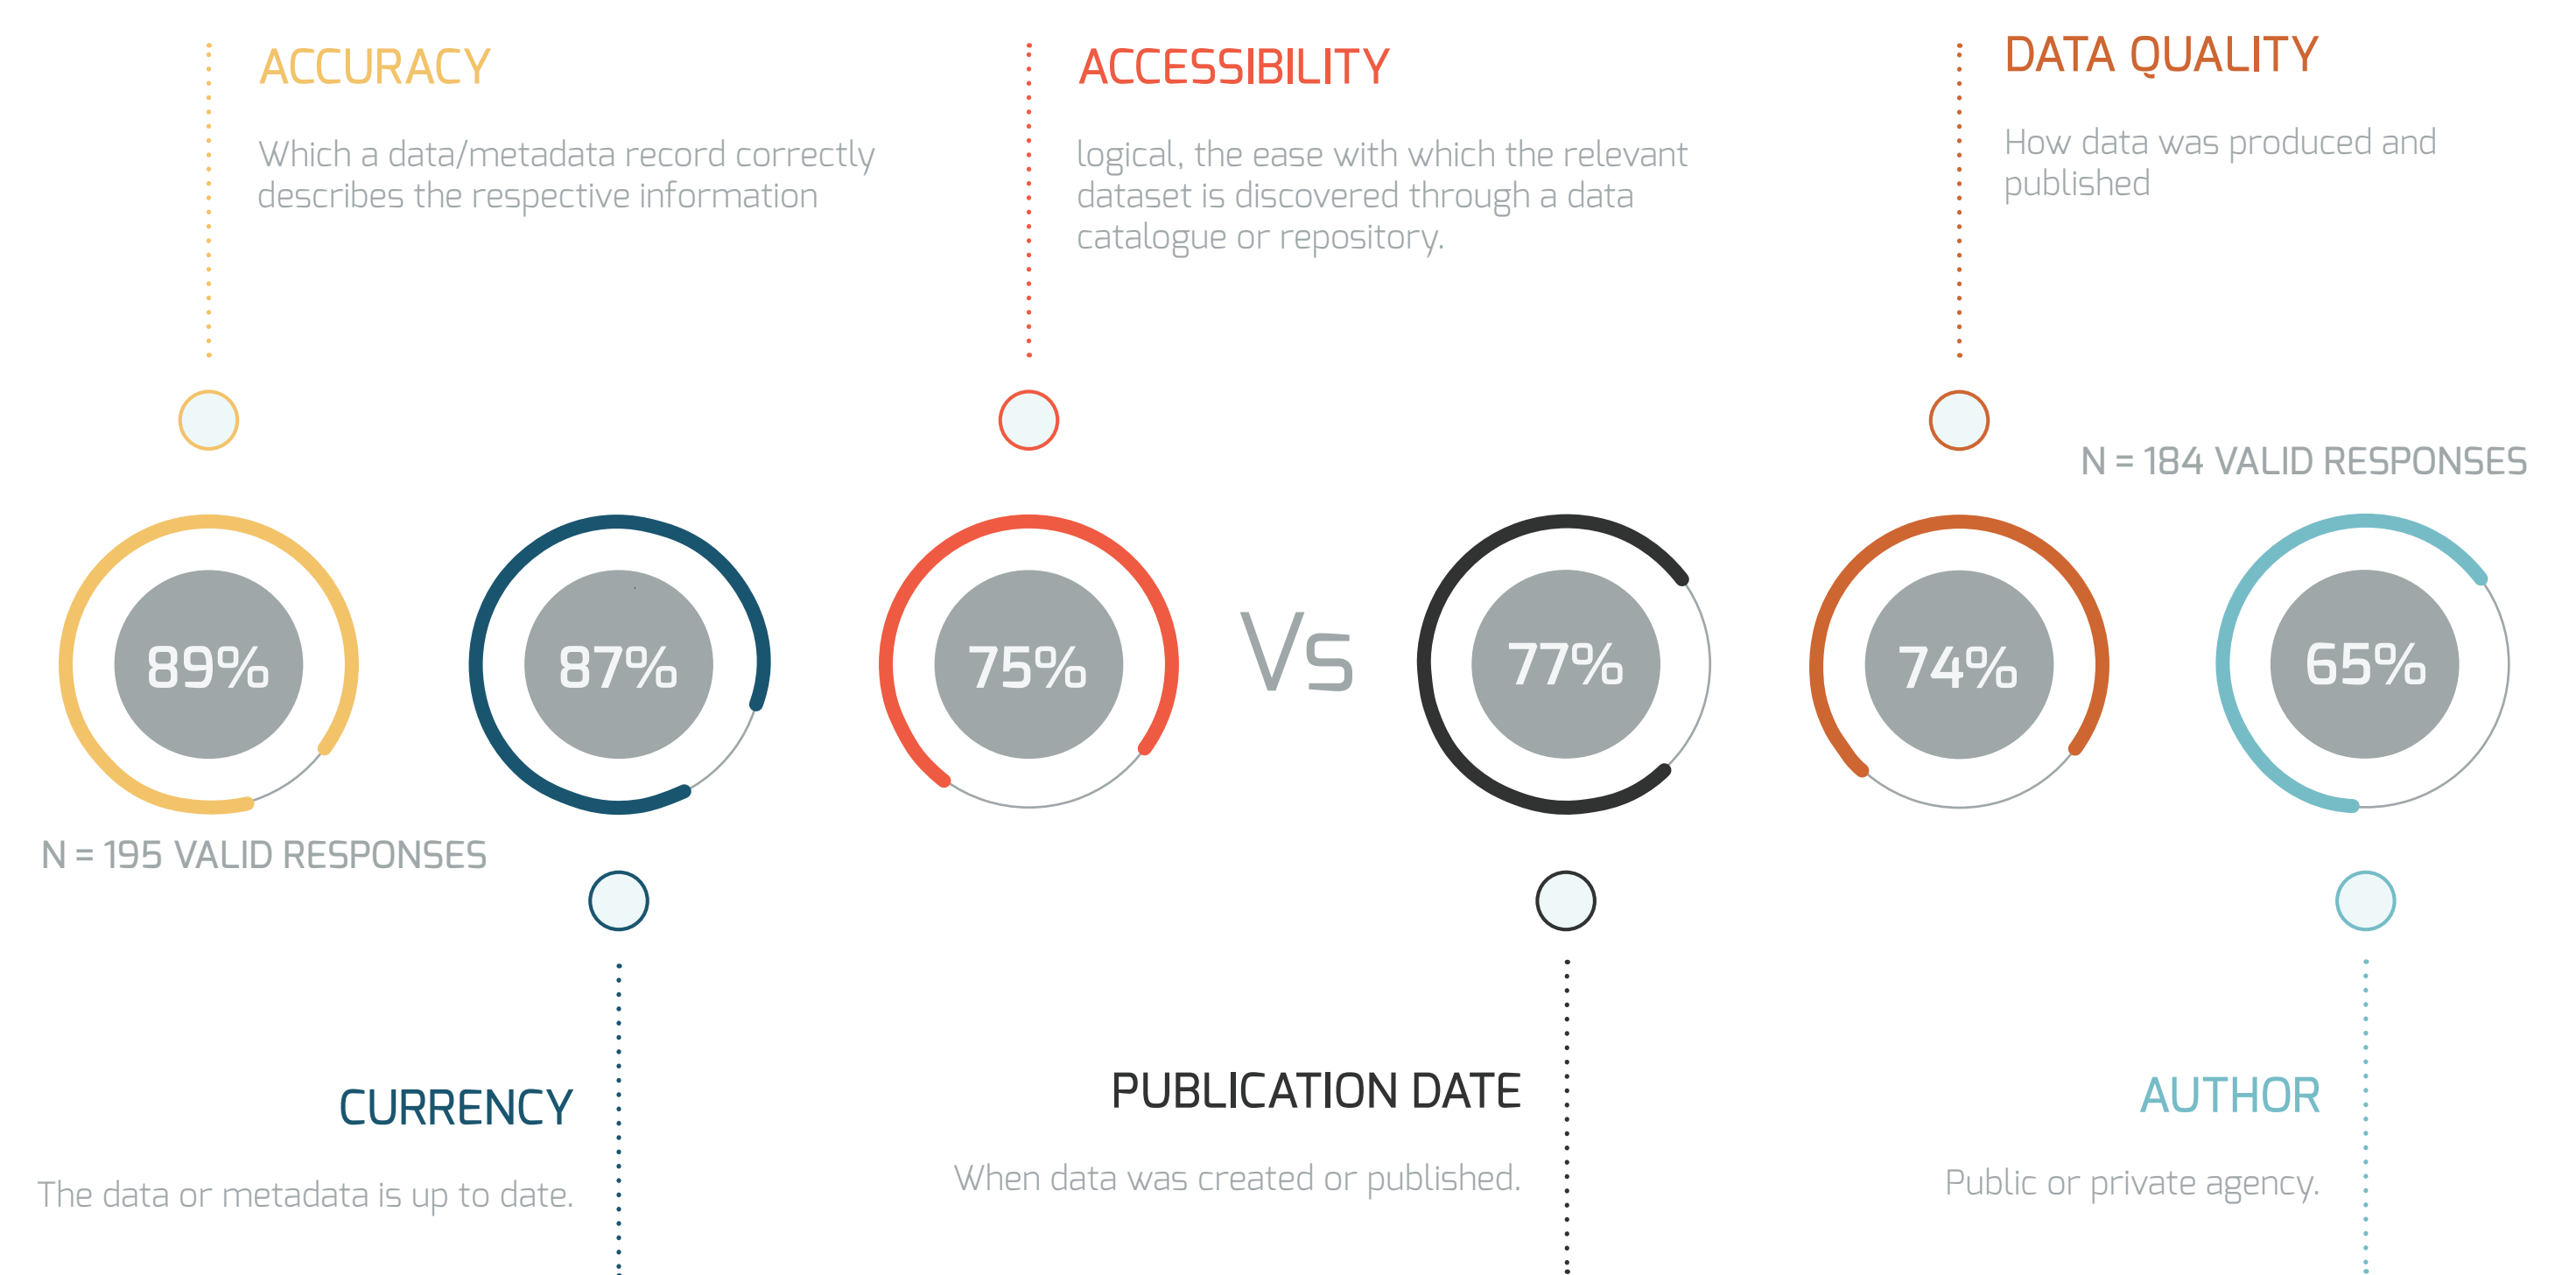

DATA USER COMMUNITIES AND AUTHORITIES

BARRIERS VS. MOST FEATURES USED

DATA QUALITY CRITERIA VS. MAIN FEATURES CONSIDERED

HOW RESPONDENTS RATHER GET DATA?
