

# The Pandemic Report Cards

## Context and Design Proposal for a World Atlas of COVID-19 Restrictions and Mandates

- Normative assessment & risk-benefit analysis
- Need, safety, and efficacy of interventions?

=> Post-pandemic recovery

<b>Canada</b>	
 <p>Geography Population</p>	
<p>Pandemic plan; public health decision-making procedures</p>	
 <p>Time series of COVID-19 outcomes: ICU admission, deaths, excess mortality</p>	
<p>Time series of response: restrictions, testing, vaccination</p>	
<p>Long-term care home protection: _____</p> <p>School closures: _____</p> <p>Small business closures: _____</p> <p>Social gatherings: _____</p> <p>Promotion of outdoor activities and healthy lifestyles: _____</p> <p>Public transit restrictions: _____</p> <p>Freedom of assembly: _____</p> <p>Publication of opposing views on public broadcaster: _____</p> <p>Face mask mandates: _____</p> <p>Vaccination mandates: _____</p> <p>Vaccination passports: _____</p>	
<p><b>Overall grade: __</b></p>	

Selection of report card criteria? Quantifiable? Outcomes, ratings, and underlying values.
