

The fontawesome5 package*

Font Awesome[†](The font)
Marcel Krüger[‡](The L^AT_EX package)

June 4, 2021

This package provides L^AT_EX support for the Font Awesome 5 icons.
To use Font Awesome 5 icons in your document, include the package with

```
\usepackage{fontawesome5}
```

Alternatively you can add the `fixed` option to get fixed-width icons:

```
\usepackage[fixed]{fontawesome5}
```

For every icon a macro is provided: Just use the official icon names converted to CamelCase with the prefix `\fa`. For example to use the `hand-point-up` icon, use `\faHandPointUp`. For icons ending with `-alt`, append a `*` instead. An optional argument can be added to select the style (`solid` or `regular`). The default style is `solid`, it can be changed with `\faStyle{...}`

Every icon can also be accessed using the official icon name. To do this, you can use `\faIcon{the-icon-name}` or `\faIcon[style]{the-icon-name}`.

A list of all included icons with their respective commands can be found at the end of this document.

Example

```
...
\usepackage{fontawesome5}
...
\begin{document}
...
A simple icon: \faHandPointUp\
Multiple versions of the file icon:
\faFile~
```

*This document corresponds to fontawesome5 version 5.15.3, dated 2021/06/04

[†]More information at <https://fontawesome.com>

[‡]E-Mail: tex@2krueger.de

```

\faFile*~
\faFile[regular]~
\faFile*[regular].\\
Alternative syntax:
\faIcon{file}~
\faIcon*{file}~
\faIcon[regular]{file}~
\faIcon*[regular]{file}.
...
\end{document}

```

A simple icon: 

Multiple versions of the file icon:    .

Alternative syntax:    .

Font Awesome Pro

Font Awesome 5 is available in a Free and a Pro version. This package uses the free version by default. If you own a Pro license and have the Font Awesome 5 Pro desktop fonts installed in your system font path, you can use Pro instead. For this, load the package with the `[pro]` option:

```
\usepackage[pro]{fontawesome5}
```

Now additional icons, the `duotone` and the `light` style can be used. The second color for duotone icons can be set though `\faDuotoneSetSecondary`:

```
\faDuotoneSetSecondary{green}% From here on, the secondary layer
                             % will be green.
```

Pro is only supported with $\text{X}_{\text{L}}\text{A}_{\text{T}}\text{E}_{\text{X}}$ and $\text{L}_{\text{u}}\text{a}_{\text{L}}\text{A}_{\text{T}}\text{E}_{\text{X}}$.

Updates

This package corresponds to Font Awesome 5.15.3. In case there is a newer version available on the Font Awesome homepage, check for updates on <https://ctan.org/pkg/fontawesome5>. Should there be no corresponding update on CTAN, you can write a mail to tex@2krueger.de. If you use $\text{X}_{\text{L}}\text{A}_{\text{T}}\text{E}_{\text{X}}$ or $\text{L}_{\text{u}}\text{a}_{\text{L}}\text{A}_{\text{T}}\text{E}_{\text{X}}$, you can also directly download the new Desktop Fonts from <https://fontawesome.com> into your $\text{T}_{\text{E}}\text{X}$ tree.

If you save them with the filenames

```
FontAwesome5Brands-Regular-400.otf
```

```
FontAwesome5Free-Regular-400.otf
```

```
FontAwesome5Free-Solid-900.otf
```

the package will start using the new version right away.

Bugs

For bug reports and feature requests, write to tex@2krueger.de.
